

*Ex db ib mb [ib] IIB T4 Gb*

Our latest battery innovation is specifically designed for use in areas with explosion hazards. With a robust and reliable design, it can power a variety of devices for remote data logging and sampling in challenging environments. Use our explosion-proof battery for a dependable and efficient energy source that meets the demands of hazardous environments.

- Unique **zone 1** use
- Robust aluminium design
- High ingress protect **IP65**
- Compact custom ExD connector

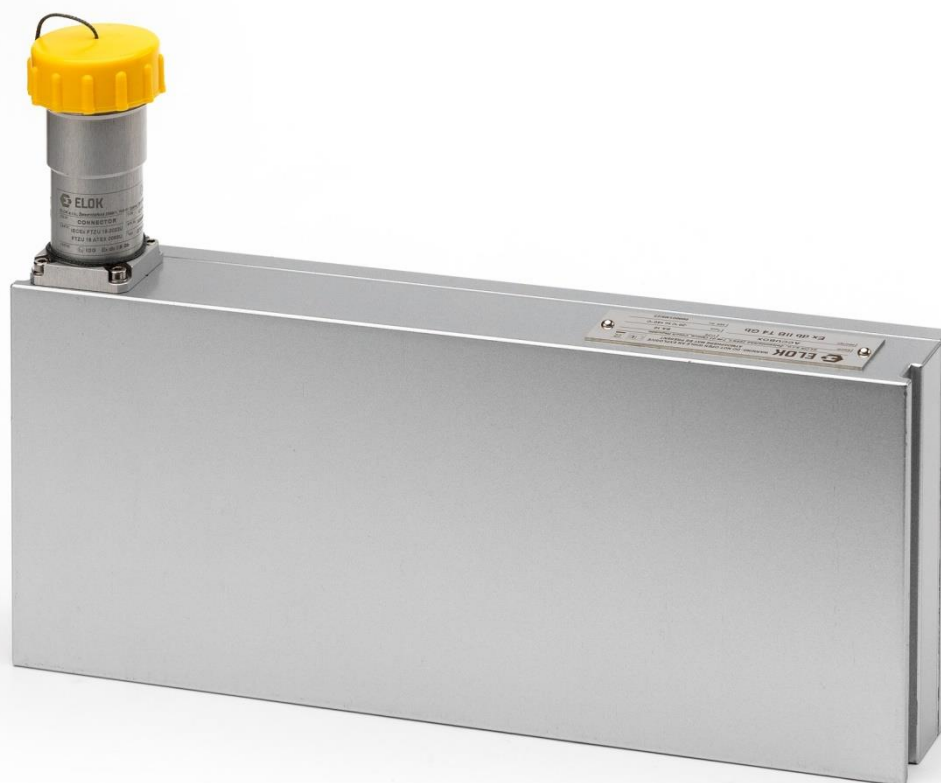

**Accubox BA.10**

Protection ..... Ex db IIB T4 Gb  
 Certificate ..... IECEx  
 Ingress Protection ..... IP65  
 Ambient Temperature ..... -20°C to +50°C  
 Capacity ..... 10Ah  
 Technology..... Li-Ion  
 Rated output voltage ..... 14.6V  
 Rated output current..... 1.5 A  
 Enclosure Material ..... Aluminium  
 Dimensions ..... 280 x 125 x 45 mm  
 Weight ..... 3 kg

**Charger**

Charging time..... less then 10h  
 Charging voltage ..... 19V  
 Charging Current ..... 2.4 A
