II 3G Ex ic IIB T4 Gc

Our latest battery innovation is specifically designed for use in areas with explosion hazards. With a robust and reliable design, it can power a variety of devices for remote data logging and sampling in challenging environments. 5LED's on top panel indicate battery capacity. Opt for our explosion-proof battery for a dependable and efficient energy source that meets the demands of hazardous environments.

- Unique **zone 2** use
- Standalone capacity indication
- High ingress protection **IP65**
- Two times 12V output

Accubox 2

Protection Ex db IIB T4 Gb
 Ingress Protection IP65
 Operating Temperature -10°C to +40°C
 Capacity 3.2 Ah
 Technology..... LiFePO
 Output 2x
 Rated output voltage 14.3V
 Rated output current..... 2.4 A
 Enclosure Material Plastic
 Dimensions 151 x 80 x 60 mm
 Weight 1 kg

Splitter – 4A

Rated output voltage 14.3V
 Rated output current..... 4 A
 Output 1x

Charger – GC30B

Rated output voltage 14.3V
 Rated output current..... 4 A
 Output 1x
